Highlights

Advanced No Frost

By using independent circulation systems for the freezer and fridge frost is prevented, as are odours from one section to the next.

GentleAirFlow

This advanced air flow distribution circulates the cold air through the whole fridge meaning that no food is exposed to direct cold air which can dry food out.

Opti Fresh

Allows adjustment of humidity levels to help preserve fruit and vegetables

AdaptiLift

Easily adjust the position of the door trays to suit your needs.
